

## AIR STORE assigned as Bose aviation partner

**Sandhausen, July 1st 2017:** Bose, a leading manufacturer of aviation headsets, has entered into a new dealership agreement with AIR STORE to sell its product line of premium aviation headsets.

A dedication to research and excellence: It's the Bose approach to better sound, and it has been since Bose's founding in 1964. Bose has provided high performance communication headsets for pilots in the aviation industry for almost 25 years. The newest Bose headset, the A20® Aviation Headset, is favored among pilots for its noise reduction technology, comfortable fit and clear audio.

The A20 headset gives pilots 30% greater noise reduction than conventional aviation headsets, so they'll enjoy a peaceful flight from short stops to long hauls. And at just 12 ounces, with sheepskin cushions and minimal clamping force, it's one of the lightest and most comfortable aviation headsets one will find. All designed to let pilots focus on what matters — flying.

As an authorised Bose Aviation Partner, AIR Store is now capable of offering the complete Bose aviation headset lineup directly ex-stock Sandhausen, Germany.

„The addition of Bose aviation headsets represents a remarkable step for AIR STORE on its mission to become one of the top suppliers of pilot supplies and aviation parts in Europe“ says Marc Förderer of AIR STORE. „We utilize extensive stock and AIR STORE's commitment to excellence in customer service to guarantee for instant delivery and great service. In addition to fast shipping and expert service, a no-questions-asked 30 day return policy on all headset orders placed through AIR STORE underlines that AIR STORE is a good place for any pilot to purchase a new headset.“

Effective today, Bose products are directly available for purchase at [www.air-store.eu](http://www.air-store.eu) and in the AIR STORE showroom in Sandhausen, Germany.

AIR Store offers a broad line-up of over 1,300 premium aviation products to pilots, OEMs, maintenance facilities and dealers worldwide. We yearly serve thousands of customers through our online store at [www.air-store.eu](http://www.air-store.eu) and through an international dealership network. Our customers value fast shipping, competent technical support, extensive stock and great processes. Our showroom in Sandhausen, Germany offers space for professional advice in person.

The sister brand AIR Avionics is an EASA certified manufacturer (DE.21G.0173) and maintainer (DE.145.0447) of avionics systems. We offer state-of-the-art products in the area of collision avoidance, ADS-B transponders, aviation radios and flight information systems.
